

Avast Cleanup

The longer you use your PC, the more it will get bogged down by residual files, unused junk data, useless applications, and accumulated browser data. This can rob you of precious bytes that could store photos, games, movies, and more. Reclaim your PC from the data-gobbling menace with Avast Cleanup, the quick, secure way to get your PC running like new. With cleaning, optimization, and scheduling functions, you can give your PC more space, improve performance, and remove potentially dangerous apps.

KEY FEATURES

ROUND UP JUNK FILES

Huge chunks of your data are taken up by useless 'junk files' such as software distribution, temporary files, driver packages, system logs, and more. Getting rid of these files can give you a full feature-length movie's worth of data!

SCRUB THAT BROWSER CLEAN

Clear your browsing and download history to erase your presence online, but don't stop there: You can also erase elements like your browser's cache, cookies, and tracking cookies — spies that give your browsing data to advertisers.

CLEAN YOUR PC AUTOMATICALLY

Why not let us do all the work? Set up schedules for your Cleanup so we can give your PC a much-needed cleaning on a monthly, weekly, or even daily basis to make sure it stays at the top of its game.

BOOST YOUR STARTUP TIME

By adjusting your settings, delaying or disabling any application that tries to boot up with your computer, you can wake your PC up even faster from its power naps

ADD-ON AND SEARCH ENGINE CLEANER

If your browser has an add-on with a bad reputation or an untrusted search engine, you can identify and remove these problem elements and replace them with more trustworthy alternatives.

REGISTRY CLEANING, AT YOUR DISPOSAL

Your registry is one of the most important parts of your PC — show it a little love by giving it an in-depth cleaning, and free up some space.

GET YOUR PC RUNNING ITS BEST

Some apps don't have your best interests in mind. Disable these untrustworthy applications to make your PC safer and perform better. To double down on better performance, you can also tweak system settings to keep things running smoothly.

PROTECT YOUR CLEANLINESS — IN REAL TIME

When you uninstall a program, it usually leaves leftover files on your machine that don't really need to be there. Cleanup automatically detects these pesky files and gets rid of them before they can add up.

SYSTEM REQUIREMENTS:

PC:

Processor Pentium 4, 256 MB RAM,
100 MB of free hard disk space
Microsoft Windows XP SP3/Vista/7/8/8.1/10
(32/64 bit)

Avast Cleanup is Windows 10 compatible.

COMPARE AVAST CLEANUP VERSIONS:
