Avast Internet Security 2016

Our best-seller for a reason. Avast Internet Security 2016 offers advanced protection for everything you do online. It's especially useful against copycat banking sites or phishing emails and a new, improved https scanner protects you from more infected sites than ever before. As expected, it features the best core protection available, including firewall, anti-spam, safe banking, and more, with added improvements in home network scanning so you can keep everything on your network safe.

KEY FEATURES - AVAST INTERNET SECURITY

UNIQUE FEATURES

new! AVAST PASSWORDS
Change bad habits like storing passwords on your browser or reusing the same password. Avast's new password manager creates unique, unbreakable passwords for all your accounts — yet only asks you to remember one.

improved! HOME NETWORK SECURITY
Even better protection for everything on your home network. Avast 2016 detects 12 more types of router vulnerabilities so you can keep your printers, network drives, and routers fully secured — in just a click.

improved! SECURE HTTPS SCANNING
Improved WebShield technology allows your Avast to scan all HTTPS sites for malware and threats. It whitelists your banking sites and bank certificates too, so that scanning doesn't slow your access one bit.

BROWSER CLEANUP
Why let anyone change your search provider without your permission? Browser Cleanup gets rid of any bad add-ons and unwanted toolbars, so you can restore the settings you like.

improved! SECUREDNS PROTECTION
DNS hijacking is real — and hackers know what they're doing. It's easy to accidentally type all your login details into a replica of your banking site. SecureDNS encrypts the connection between your PC and our DNS server so you won't fall for any fakes.

BETTER PROTECTION

unique! 230 MILLION SENSORS
With more than 230 million globally distributed sensors we find, isolate, and neutralize malware no matter where it starts. By combining massive data engines running AI software with some of the smartest virus spotters in the world, we constantly double- and triple-check the latest threats to keep you safe.

improved! ANTIVIRUS AND ANTI-MALWARE
We continue to improve the world's most trusted antivirus and anti-malware engines to keep you better protected. Using security updates the size of a text message, we distribute updates several times an hour to keep you completely up-to-date.

new! SAFEZONE BROWSER
SafeZone Browser makes sure you always bank, shop and browse in safety. Pay Mode opens banking sites in an isolated space protected from thieves and spies, while Shielded Window opens any suspicious sites in an isolated environment where they can't harm your computer.

SANDBOX
Downloaded something you're unsure of? Sandbox lets you run apps, watch videos, or check websites in an isolated space so you don't harm the rest of your computer. If your download is safe, move it onto your machine; if not, your computer is safe and you've risked nothing.

FIREWALL
Stop hackers getting unauthorized access to your computer. Avast's silent firewall quietly filters the data that reaches your computer, eliminating known threats — and isolating those that seem suspicious.

SYSTEM REQUIREMENTS:

PC:
Processor Pentium 4, 256 MB RAM,
1,5 GB of free hard disk space
Microsoft Windows XP/Vista/7/8/8.1/10
(32/64 bit)

WINDOWS 10 COMPATIBLE
Avast 2016 is Windows 10 compatible.

BETTER CONVENIENCE

SMART SCAN TECHNOLOGY
An all-in-one scan, all in one go. Check your computer's operating status, make sure there are no network threats, malware or viruses, and search for outdated software in just one click. It's the easiest way to stay safe.

new and improved! CLEANUP
Meet our most advanced cleaning tool yet. Speed up your PC in minutes, win back space you didn't know you had, and reduce your startup times. Cleanup makes your PC more efficient so you can be more efficient, too.

improved! SECURELINE VPN
A private channel just for you. Keep your chats, photos, and emails safe with a world-trusted VPN. SecureLine encrypts everything you send and receive, hides your IP address (and lets you change it, too) for greater security and access to content all around the world.
SOFTWARE UPDATER
Hackers love to exploit old software. Software Updater lets know whenever there is an update to the software you're running — so you can quickly patch any weak points before hackers have a chance to attack.

OTHER FEATURES

MY AVAST INTEGRATION
Phone, PC, and tablet all protected by Avast? Great! You can control and manage all your devices directly from within the Avast product console. Add special features or score points toward badges, free products, and upgrades.
