

Avast Free Antivirus 2016

World-trusted protection for your home, phone, or business. Avast Free Antivirus 2016 offers the best antivirus and anti-malware available, along with features you're most likely to need but would rather not think about – like one-click system checks and unwanted toolbar removal. The first-ever free home network scanner now detects 12 more types of router vulnerabilities, and a new password manager feature means your antivirus can now save, and encrypt, all of your passwords.

KEY FEATURES - AVAST FREE ANTIVIRUS

UNIQUE FEATURES

new! AVAST PASSWORDS

Change bad habits like storing passwords on your browser or reusing the same password. Avast's new password manager creates unique, unbreakable passwords for all your accounts – yet only asks you to remember one.

improved! HOME NETWORK SECURITY

Even better protection for everything on your home network. Avast 2016 detects 12 more types of router vulnerabilities so you can keep your printers, network drives, and routers fully secured – in just a click.

improved! SECURE HTTPS SCANNING

Improved WebShield technology allows your Avast to scan all HTTPS sites for malware and threats. It whitelists your banking sites and bank certificates too, so that scanning doesn't slow your access one bit.

BROWSER CLEANUP

Why let anyone change your search provider without your permission? Browser Cleanup gets rid of any bad add-ons and unwanted toolbars, so you can restore the settings you like.

BETTER PROTECTION

unique! 230 MILLION SENSORS

With more than 230 million globally distributed sensors we find, isolate, and neutralize malware no matter where it starts. By combining massive data engines running AI software with some of the smartest virus spotters in the world, we constantly double- and triple-check the latest threats to keep you safe.

improved! ANTIVIRUS AND ANTI-MALWARE

We continue to improve the world's most trusted antivirus and anti-malware engines to keep you better protected. Using security updates the size of a text message, we distribute updates several times an hour to keep you completely up-to-date.

BETTER CONVENIENCE

SMART SCAN TECHNOLOGY

An all-in-one scan, all in one go. Check your computer's operating status, make sure there are no network threats, malware or viruses, and search for outdated software in just one click. It's the easiest way to stay safe.

new and improved! CLEANUP

Meet our most advanced cleaning tool yet. Speed up your PC in minutes, win back space you didn't know you had, and reduce your startup times. Cleanup makes your PC more efficient so you can be more efficient, too.

improved! SECURELINE VPN

A private channel just for you. Keep your chats, photos, and emails safe with a world-trusted VPN. SecureLine encrypts everything you send and receive, hides your IP address (and lets you change it, too) for greater security and access to content all around the world.

SOFTWARE UPDATER

Hackers love to exploit old software. Software Updater lets know whenever there is an update to the software you're running – so you can quickly patch any weak points before hackers have a chance to attack.

SYSTEM REQUIREMENTS:

PC:

Processor Pentium 4, 256 MB RAM,
1,5 GB of free hard disk space
Microsoft Windows XP/Vista/7/8/8.1/10
(32/64 bit)

Avast 2016 is Windows 10 compatible.

OTHER FEATURES

MY AVAST INTEGRATION

Phone, PC, and tablet all protected by Avast? Great! You can control and manage all your devices directly from within the Avast product console. Add special features or score points toward badges, free products, and upgrades.
