

# Avast Cleanup Pro for Mac

Every Mac needs a cleanup. Every day.

## Cleans thousands of junk files

MacOS and your apps create thousands of temporary files and cache they need to work, but often forget to delete. Avast Cleanup Pro can delete gigabytes of these files in one go, to free up space.

## Removes secret duplicates

Creating clones of photos, videos or other files is an inevitable side-effect of everyday computer use. . Avast Cleanup Pro finds all your duplicate and deletes the ones you don't need.

## Cleaning Alerts, the true time savers

Helps you take out the trash every day: Get regular alerts when there's clutter to clean on your Mac — and remove it with just a click.

# Avast Cleanup Pro for Mac

## What we clean:

### Junk files

MacOS and 3rd party applications automatically create temporary files, which aren't critical but waste lots of drive space.

### Browser caches

Deletes non-critical cache and temporary browsing files from Safari®, Chrome®, and Firefox® browsers to free up drive space and protect your privacy.

### Log files

Applications create logs to record normal operation or how they crashed. In most cases you won't need them, so why keep them?

### Trash

Trashing files doesn't delete them. Get rid of the forgotten files in your macOS recycle bin.

### Downloads

Removes downloads you've forgotten a long time ago.

### External Drives Junk

You can safely delete system files that macOS adds to external drives formatted for other operating systems.

### Duplicates

Deep-scans your disk to find duplicate documents, pictures, songs, videos, folders, and other files. Use file size, date, and our preview to decide which clone you need — and which you can get rid of forever.

#### System Requirements:

For Macs running macOS 10.10 (Yosemite) or later with at least 68 MB of disk space.  
An internet connection is also required for automatic updates to our cleanup.
